CONTENTS

Reactivity of oxidized nickel(II) PnAO quasi-aromatic complexes, R. K. Murmann (Columbia, MO, U.S.A.) and E. G. Vassian (Cullowhee, NC, U.S.A.) 1

Photoreactions of tetrakis(μ-pyrophosphito)diplatinate(II) with alcohols and hydrocarbons, R. J. Sweeney, E. L. Harvey, and H. B. Gray (Pasadena, CA, U.S.A.) 23

Transition-metal-propargyl complexes: versatile reagents in synthesis, A. Wojcicki and C. E. Shuchart (Columbus, OH, U.S.A.) 35

Structural aspects of thiophene coordination in transition metal complexes, R. J. Angelici (Ames, IA, U.S.A.) 61

Ambidentate ligands, the schizophrenics of coordination chemistry, J. L. Burmeister (Newark, DE, U.S.A.) 77

Biomimetic metal encapsulation, K. N. Raymond (Berkeley, CA, U.S.A.) 135

Iron bioavailability and the coordination chemistry of hydroxamic acids, A. L. Crumbliss (Durham, NC, U.S.A.) 155

Selective air oxidation of light alkanes catalyzed by activated metalloporphyrins - the search for a suprabiotic system, P.E. Ellis, Jr. and J. E. Lyons (Marcus Hook, PA, U.S.A.) 181

Coordination chemistry of polychalcogen anions and transition metal carbonyls, J. W. Kolis (Clemson, SC, U.S.A.) 195

Hydrogen bonding in transition metal fluorides, T. G. Richmond (Salt Lake City, UT, U.S.A.) 221

Kinetics and mechanism of the Mn(III)gluconate catalyzed decomposition of hydrogen peroxide, M. E. Rerek, I. Weil, and M. Hill (Edgewater, NJ, U.S.A.) 251

Author index 269
